**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to system comprising mobile measuring device with model, classified in class 702, subclass 182.
- II. Claims 13-53, drawn to methods including augmenting models, directing a user, classified in class 702, subclass 122.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus, as claimed in claims 1-12 can practice each distinct process as claimed in claims 13, which requires augmentation of a model and claim 26, which requires directing a user.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required

Art Unit: 2863

because the inventions require a different field of search (see MPEP § 808.02),  
restriction for examination purposes as indicated is proper.
